

MODEL LC BHC-1212

12 Amp Battery Charger

Solid State Charger

Electrical Specifications:

- Input Voltage: 100/240V AC
- Input Frequency: 50/60Hz
- Output Current: 12A
- Output Equalizer Voltage Voltage: 14.7V
- Output Float Voltage: 13.5V
- Battery Application: AGM/Wet Lead Acid
- Battery Capacity: 50AH – 200AH
- Operating Temperature: 32°F to 120°F
- Dimensions: 7.32" x 3.46" x 1.87"
- Weight: 1.76 lbs.

Characteristic

- 3 Stage Charging Profile
- Mode Indicator L.E.D.
- Demand Sensing
- True Float Mode
- Protections:
 - Over Voltage
 - Thermal
 - Short Circuit
 - Reverse Polarity:
